

Gadgetron Robot Factory

Design a Robot In Minutes!

Design robots on the web

The Robot Factory web tool makes it fun and easy to design simple, Arduino-based robots without any electronics experience.

Robot Factory designs the electronics

Once your design is complete, the Gadgetron Robot Factory analyzes your design and creates all the design files necessary to manufacture the robot.

Assemble and program the robot

After you've received all the parts, you can assemble your robot using simple soldering skills and then program it with the Arduino IDE.
